

WEB APPLICATION ARCHITECTURES

Making decisions

Objectives

In this exercise you use if statement to make decisions in code

Reference material

This exercise is based on material from the “Making Decisions” chapter.

Overview

- In this exercise you will experiment with If statement and variables

Estimated duration

The estimated duration for this lab is 15 minutes.

Completed solution

There is a completed solution for this lab.

Step by step instructions

1. Open the JavaScript file that you created in previous chapter and the HTML page that refers to it.
2. Use the example given on the slides to ask your users if they “would like to save?”
3. Display a suitable message in each case
4. Run to test your code

When You Have Time

5. Change you code so that if the user says they do NOT want to save, they are further prompted: “Are you sure?”
6. Display a suitable message in each case.
Hint: you will to use nested ifs.
